

Y-TRACE System Changes Documentation

Coverage October 8 2026 only
Updated October 8 2026 at 06:10 AM Philippine time

This record covers the reporting filters, seeded-data revisions and interface changes recorded on October 8. Times are Philippine time. Code entries use commit timestamps; database entries use migration registration timestamps.

Quarterly filters and seed data

Date and time	Description
2026-10-08 05:10:22 AM	Quarterly export filters Applied database support for date-bounded admin exports for Budget Requests, Liquidation Reports and Activity Logs. Migration admin_quarterly_export_filters.
2026-10-08 05:25:12 AM	Independent year and quarter filters Applied All Year and quarter filtering across years. Liquidation filtering uses report creation date; budget filtering uses activity date with a creation-date fallback.
2026-10-08 05:35:15 AM	Budget Monitoring All Year Applied full-dataset and recurring-quarter filtering. Quarter selections retain annual allocation context instead of treating the quarter as a separate allocation.
2026-10-08 05:42:50 AM	Period-scoped budget cards Applied summaries for Pending Review, Approved Budget and Released Budget based on the selected year and period.
2026-10-08 05:51:51 AM	Seed quarter coverage Redistributed the 84 marked records: 2024 Q1-Q4 have 8/8/8/7 requests; 2025 Q1-Q4 have 12/12/12/11; 2026 Q1 has 6. Each quarter includes releases and liquidation reports.
2026-10-08 05:59:50 AM	Unique projects and varied budgets Applied 84 distinct seeded project titles and varied requested, approved and released amounts across all seeded quarters. Preserved statuses, dates, linked report data and non-seeded accounts.

Interface changes and release

Date and time	Description
2026-10-08 06:03:54 AM	Reporting controls and defaults Committed header Year/Period controls beside Export, removed the redundant semester controls on the requested pages, and set initial filters to the current Philippine year and quarter. All options remain available.
2026-10-08 06:03:54 AM	Chevron spacing and release record Committed the shared dropdown chevrons with 12-pixel right spacing and the updated seed preview catalog. Commit 12eb2f3 was pushed successfully to txiaoqt/lydorg main.

Seeded budget totals

The revised database totals below cover the marked 84-record sample dataset. Released amounts do not exceed approved amounts. These figures exclude non-seeded accounts.

Period	Approved budget	Released budget
2024 Q1	PHP 439,000	PHP 259,000
2024 Q2	PHP 325,000	PHP 214,000
2024 Q3	PHP 436,000	PHP 271,000
2024 Q4	PHP 394,000	PHP 324,000
2025 Q1	PHP 643,000	PHP 395,000
2025 Q2	PHP 569,000	PHP 413,000
2025 Q3	PHP 664,000	PHP 420,000
2025 Q4	PHP 475,000	PHP 364,000
2026 Q1	PHP 309,000	PHP 239,000

Verification and release

Database checks confirmed 84 unique normalized project titles, quarter coverage and varied amounts. Before-and-after comparisons confirmed the protected renewal test account, non-seeded budgets and reports, existing workflow statuses, and financial immutability guard were preserved.

Commit 12eb2f3 was pushed successfully to <https://github.com/txiaoqt/lydorg>, branch main. This records the Git release; Vercel deployment status was not checked.

Record sources

Git commit history and diffs; applied Supabase migration records; docs/admin-quarterly-reporting.md; live seeded-budget aggregate checks. Migration timestamps were converted from UTC to Asia/Manila. The latest commit timestamp records the code release, not the exact push completion time.
